

Cellular & Pleated Shades

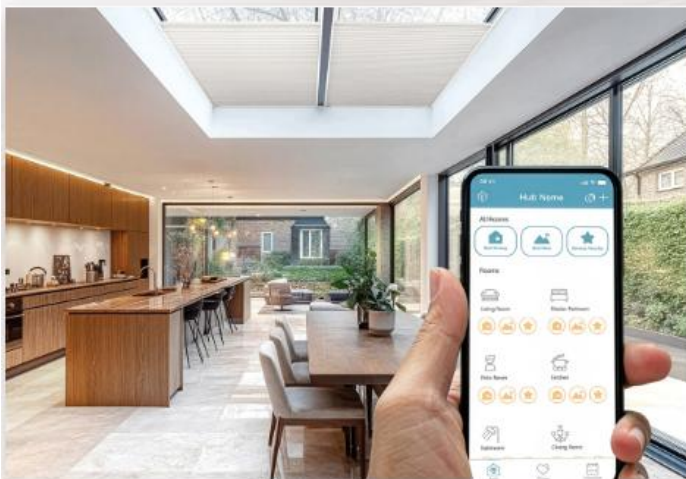

No Drill Honeycomb

Lantex USA INC

Lantex R&D team

The Lantex No Drill Honeycomb Shade is a custom-made window solution designed for simple, damage-free installation. Using an innovative compression bracket system, it fits securely inside the window frame without screws or tools. The cordless design offers smooth, safe operation, with an optional motorized upgrade for added convenience. It delivers a clean, tailored look without the hassle of traditional mounting.

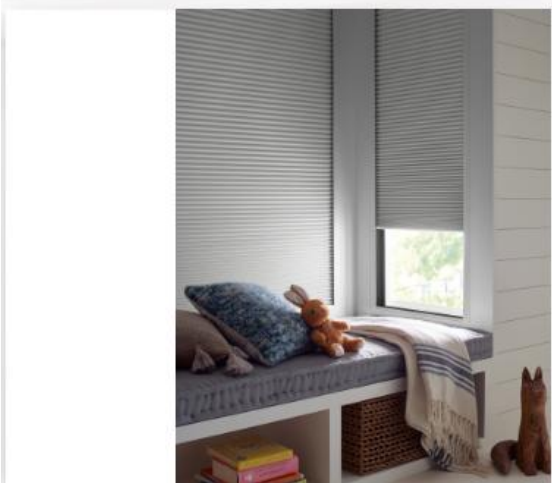

Cellular & Pleated Shades

Skylight Motorized Honeycomb

Norman International

Norman R&D Team

Motorized Honeycomb Skylight Shades offer a dependable solution for hard-to-reach windows. Designed specifically for skylights, they combine energy-efficient honeycomb construction with smooth motorized operation and smart home compatibility for effortless, connected light control. Quiet performance and a slim fabric stack when raised maintain a clean appearance while delivering flexible lighting options tailored to your space.

Cellular & Pleated Shades

Duette and Applause® Honeycomb Shades - LightLock Flex™

Hunter Douglas

Emma Feldman, Bri Vincent,
Ron Holt, Ajit Singh

LightLock Flex utilizes unique U-shaped side channels and a bottom sill channel that overlap the front and back of the shade for quick and easy install. The secret to achieving unparalleled darkness lies within the patented side channels, which feature specially shaped micro-ridges optimized to absorb and deflect all incoming light while preventing the exterior light from seeping into the room. LightLock Flex is also available for existing Duette and Applause shades as a retrofit option.

Drapery Hardware

Glydea® ULTRA 50 WireFree Zigbee

Somfy Systems
Somfy Systems, Inc.

Somfy introduces the next generation of drapery motors with the Glydea® ULTRA 50 WireFree Zigbee. This powerful lithium-ion motor supports versatile mounting positions to fit several different drapery configurations. With Zigbee 3.0 technology, it seamlessly integrates with the TaHoma® switch, providing enhanced smart functionality for users and simplifying motor setup for installers. Ultra-quiet and rechargeable, it effortlessly powers heavy drapes while maintaining a sleek, cordless aesthetic.

Green Products

Louvolite Recycled Program

Louvolite
Louvolite Fabrics Team

Louvolite is proud to hold OEKO-TEX® STeP certification at our fabric manufacturing facility, recognising environmentally responsible and socially accountable production. Today, 32% of our Louvolite manufactured fabric collection is made using recycled yarn, including our flagship Carnival light filtering and blackout ranges – crafted from recycled plastic bottles, much of which originates from ocean waste. Sustainability, performance and style – woven together.

Horizontal Blinds (All Finishes) & Motorization & Automation

Motorized Lift and Tilt Horizontal

Carsan Window Fashions
Sandro Franco

Carsan Window Fashions, Chief engineer responsible for research and development.

Carsan Window Fashions Branded WX Horizontals. Motorized Lift and Tilt. Innovative technologies have created the ability to Lift and Tilt Horizontal blinds.

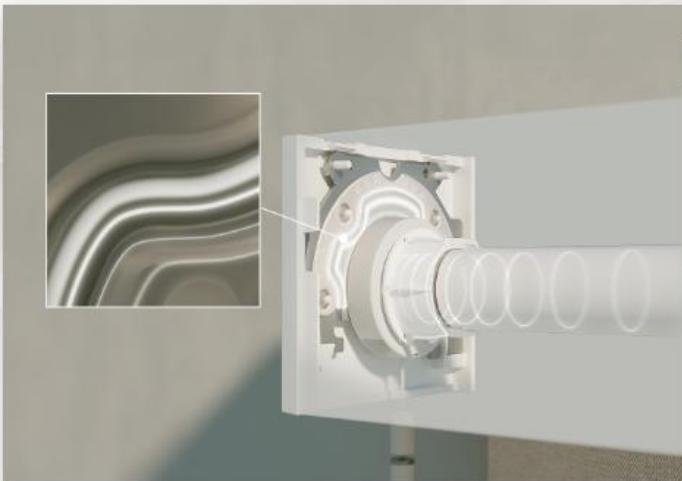

Horizontal Blinds (All Finishes)

CA Normandy Wood Blinds
Norman International
 Norman R&D Team

CA Normandy® Wood Blinds combine sustainable craftsmanship with engineered performance for the Canadian market. Constructed from eco-sourced hardwood with quarter-sawn slats for enhanced stability and warp resistance, they deliver natural beauty with long-term durability. A smooth cordless lift system supports large dimensions up to 96 inches, while a curated selection of rich finishes offers versatile light control and design flexibility.

Motorization & Automation

Absolute Silence
Coulisse
 Bas Klein Tuente & Ruben de Vries

Absolute Silence advances motorization with a full system acoustic redesign. Patented silent brackets with liquid silicone lining and precision fit drive plugs isolate vibration, while CM-03, CM-05 and CM-45 motors are acoustically tuned, and software optimized for smooth, click free motion. Engineered in our sound lab, it delivers up to 15 dB quieter performance – setting a new benchmark for smart, automated shading.

Motorization & Automation

AUTOMATE | Push Pro Remote
Rollease Acmeda
 Jonny Matuichuk (Senior Product Manager)
 Kenny Tze (Product Manager)
 Thomas Morris (Project Engineer)
 Vinnie Chew (Firmware Engineer)
 Andrew Lister

Automate Push PRO Remote is a premium handheld controller for Automate motorized shades, offering intuitive control of up to 30 shades or 15 groups. Featuring a backlit LCD screen, custom naming, and built-in timers, it enables advanced automation without a hub. Designed for easy setup and daily use, Push PRO delivers reliable ARC™ bi-directional control in a sleek, modern design.

Motorization & Automation

Balanced Roller

Coulisse

Bas Klein Tuente & Ruben de Vries

Introducing Balanced Roller, a cordless, child-safe roller shade solution featuring a pre-tensioned spring mechanism for precise manual positioning without locking. Its intuitive design allows the shade to stop exactly where desired with a gentle touch. Adjustments can be made while installed, and the spring mechanism is removable without losing tension. Lightweight and modular, it offers safety and convenience for modern homes. Customizable with color-matching control disks for a tailored look.

Motorization & Automation

Hunter Douglas Honeycomb Shades PowerView Automation with Internal Rechargeable Battery

Hunter Douglas

Josh Smith, Jessie Webster

Internal Rechargeable Battery offers convenience of rechargeable batteries with a significantly reduced minimum mounting depth – delivering a simple and sustainable, improved user experience. The rechargeable battery is concealed inside the headrail allowing for a smaller mounting depth with a clean finish. Magnetic charging adapter plugs into charging cable; magnetically attaches to charging port on shade. Pair with the extension pole for hard-to-reach shades. Compatible with Solar Charging.

Motorization & Automation

Louvolite One Touch Motors

Louvolite

Louvolite Engineering Team

Louvolite's new One Touch™ motor range delivers quieter performance, precision control and seamless smart integration with Matter & Thread technology. Featuring the advanced, unique 16-channel remote, users can operate individual or grouped blinds while viewing real-time motor and remote battery levels and exact blind position. Engineered for efficiency, reliability and a premium finish, it sets a new benchmark in intelligent window shading automation.

Motorization & Automation

Motionblinds Wired Motors by Coulisse (CM-50-E-R & CM-51-E)

Coulisse

Bas Klein Tuentje & Ruben de Vries

Motionblinds CM-50-E-R tubular motor for shades and CM-51-E motor for curtains are the only 24V DC wired motors combining Matter, Thread, RF 433 MHz, and Dry Contact. They deliver future-proof interoperability with Matter over Thread, extend the mesh network for reliable performance, install quickly with low voltage plug and play, offer rare manual override, and ensure consistent speed and unlimited runtime for perfectly aligned, trouble-free operation.

Motorization & Automation

Vignette Stacking with Internal Rechargeable Battery for PowerView Hunter Douglas

Nick Muehlbauer

With its innovative design, IRB brings convenience and peace of mind of rechargeable power to stacking Vignette. Beneficial for shallow windows that cannot accommodate hard-wiring or shades in hard-to-reach areas, the IRB design integrates the rechargeable battery into the headrail reducing the required mounting depth to just 1 1/4". Additionally, traditional battery wands can be difficult to replace or charge and generate unnecessary waste. The IRB is a more sustainable and user-friendly solution.

Point of Sale Merchandising

Louvolite Fabric Presenter Collection

Louvolite

Louvolite Creative Team

Louvolite's Fabric Presenter Collection transforms how fabrics are selected and sold. Designed for clarity and confidence, each pattern book is curated in defined ranges, guiding customers through light filtering and blackout plains, textures and patterns with ease. Complementing the books, our new lightweight Roller Fabric Presentation Box is compact, portable and features removable swatches in range format – delivering effortless in-home or showroom selling with premium impact.

2025 Combined NewStyle® Hybrid Shutters and Heritage®

Hardwood Shutters Sample Kit

Hunter Douglas

Kyle Drake, Elizabeth Steed, Tina Helart

The 2025 combined NewStyle and Heritage sample kit reflects the simplicity incorporated into the overall Hunter Douglas shutter offering. Both programs use identical frames and louver sizes, allowing both programs to be sampled in one kit. New frames for 2025 include a 3" Modern Z-Frame and Modern Casing Frame, capitalizing on the trend toward more contemporary design. Separate color trays, with refreshed color palettes, make it easy for designers to distinguish between the two programs.

Point of Sale Merchandising

2025 Designer Screen & Skyline Panels Sample Book

Hunter Douglas

Kelly Foster, Paige Wittman & Silviya Barova

The new 2025 Designer Screen & Skyline Panels Collection has elevated style, smarter sustainability, and streamlined sales tools. 35% of the collection is new, with expanded colors and fabrics—especially in 1% and 3% openness—and updates to top sellers. The new sample book features a refreshed photobook, removable fabric decks, Duolite® & hardware guides, and an Opacity sample. It also includes a Mini Screen guide which is the perfect tool to carry in with the Designer Roller & Skyline book.

Roman & Roller Shades

Absolute Roman

Coulisse

Bas Klein Tuente & Ruben de Vries

Coulisse presents Absolute Roman, a complete solution uniting curated fabrics with premium roman systems and Motionblinds motorization. Featuring the new cordless, child safe Balanced Roman configuration for smooth, intuitive control. For expansive windows, Roman XL delivers the same refined aesthetic at scale. A seamlessly coordinated concept designed for effortless everyday use.

Roman & Roller Shades

Louvolite Smart Rail

Louvolite

Louvolite Development Team

Smart Rail™ by Louvolite is a patented, two-piece roller blind bottom-bar system that transforms manufacturing speed and finish quality. Its innovative click-to-lock design eliminates stapling, sewing, welding and adhesives, reducing production time by up to 50%. Stay Flat technology ensures a perfectly tensioned, distortion-free finish every time, while its universal profile supports wrapped and exposed applications in one streamlined solution.

Roman & Roller Shades

Flex Tension Device

Rollease Acmeda

Oliver Chauhan (Mechanical Engineer)
 Dean Jay (Senior Mechanical Engineer)
 Devin Sikorski (Product Manager)

The Flex tension device is the next generation of safety devices that ensures window shading systems maintain a child-safe environment. With versions for both beaded chain & woven cord, these tension devices are designed to accommodate chain/cord stretch over time and come with a locking button located on the back of the product. These two innovations ensure the operating chain/cord maintains tension over thousands of cycles and prevent any 'work-around' to operate the system if tension is lost.

Roman & Roller Shades

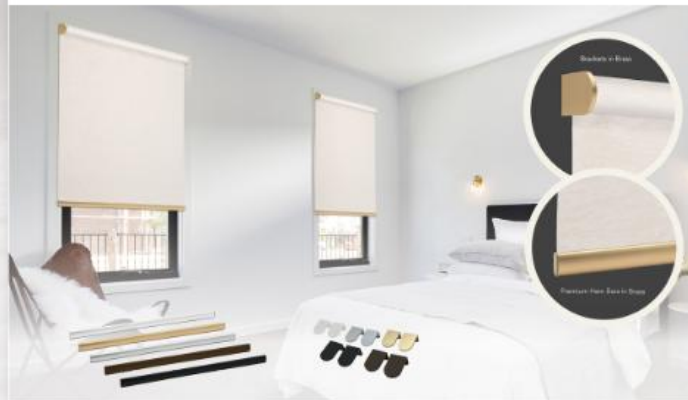

Hunter Douglas Designer Banded LiteRise Shades

Hunter Douglas

Kelly Foster, Jessica Decker,
 Max Schroeder, David McNeill

The innovative design of Hunter Douglas Banded LiteRise shades provides a child-safe solution, making it an ideal choice for most window applications. This balanced cordless system offers enhanced convenience with intuitive, effortless operation. It features a wrapped bottom rail with a clear, frosted handle for a modern appearance and smooth operation. Available with a cassette, offering a contemporary aesthetic, while concealing the fabric roll, or an open roll design for a clean, minimal look.

Roman & Roller Shades

Premium Hardware for Roller Shades

Norman International

Norman R&D Team

Premium Hardware for Roller Shades elevates open-roll design with a clean, architectural aesthetic that eliminates the need for a valance. Available in five high-quality finishes, this upgrade enhances visual appeal while maintaining compatibility across cordless, motorized, and cord loop lift options for seamless performance.

Roman & Roller Shades

Provenance Woven Woods Fine Weaves Expansion

Hunter Douglas

JoEllen Ropele, Kelly Rahn, Marvin Starks

Provenance® Woven Woods elevates the category with a refreshed assortment that brings relaxed, earthy design and eco-conscious materials indoors. Featuring on-trend neutrals and dark tones, the Fine Weaves collection introduces a distinctly softer, textile-like fabric crafted from lightweight reeds, bamboo, and jute—redefining expectations for comfort, style, and relevance in woven wood shades.

Roman & Roller Shades

SmartFold

Norman International

Norman R&D Team

SmartFold Shades reinvent Roman shade construction by combining the look of a Roman shade with the functionality of a roller shade. This hybrid design minimizes light gaps, enhances privacy, and maintains soft cascading folds. Fabric panels roll up behind the valance for clear outside views, while liftable folds allow a quick peek outside when needed. Available in a range of fabrics and styles with cordless or motorized operation, SmartFold blends refined design with purposeful innovation.

Shadings/Sheers

Luminette – Cambric Linen™ Fabric

Hunter Douglas

Hadir Eldeeb

Cambric Linen reintroduces a linen look—long popular across all product lines and missing from the vertical sheer category since 2020. Available in six colorways in both light-filtering and room-darkening options, it quickly became one of Luminette's top selling fabrics.

Shadings/Sheers

Pirouette A Deux Hunter Douglas Zeke Buck

Pirouette® enhanced its room-darkening performance with the addition of the A Deux™ dual-roller design option. Available with all light-filtering fabrics and PowerView® Automation, A Deux™ features an independently operated room-darkening panel discreetly positioned behind the Pirouette front shade. This innovation delivers a premium room-darkening solution that seamlessly combines beauty, precise light control, and enhanced privacy.

Shutters

Skylight Normandy Shutters Norman International Norman R&D Team

Normandy® Skylight Shutters extend premium hardwood craftsmanship to overhead applications. Available in L-frame and Z-frame options, they provide a modern, tailored fit for skylights. For added convenience, choose PerfectTilt™ motorization, featuring built-in solar panels for extended battery life between charges. Secure panel locks ensure stability, delivering refined light control, energy efficiency, and timeless design from above.

Shutters

AquaShield Shutters Norman International Norman R&D Team

AquaShield™ Shutters are fully waterproof interior shutters engineered for high-moisture environments. Built with durable ABS copolymer components and corrosion-resistant hardware, they resist warping, cracking, shrinking, and rust in bathrooms, kitchens, and shower areas. The integrated InvisibleTilt® system provides clean sightlines and precise louver control, delivering lasting performance without compromising architectural design.

Shutters

SoftClose™ Louvers with Quick Align on Palm Beach™ Polysatin™ Shutters

Hunter Douglas

Michael Hansen, Nathaniel Jenkins, Ignacio Serrano

SoftClose™ Louvers with Quick Align is a patented technology that transforms opening and closing louvers into a luxury experience, making louver closure complete and uniform with one single touch. The five preset louver positions of the Quick Align feature allow for fast, consistent louver alignment within a single panel or across multiple panels. Aligning louvers has never been easier. SoftClose Louvers is now available on all Hunter Douglas Shutter types.

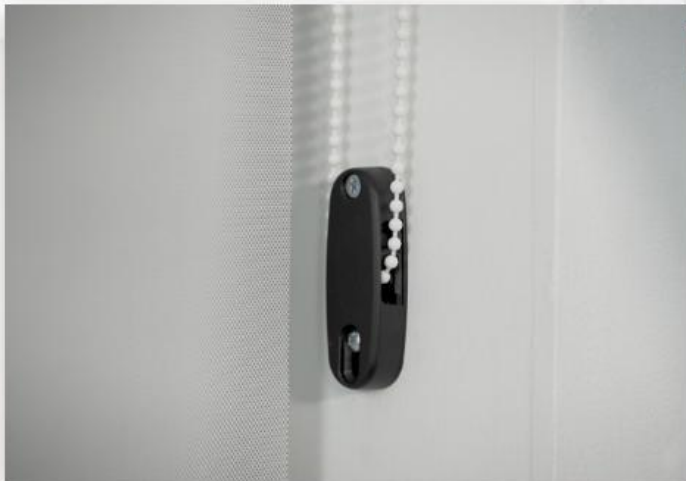

Specialty Applications & Miscellaneous Products

Safety Tensioner Range

Coulisse

Bas Klein Tuente & Ruben de Vries

Coulisse's Safety Tensioner range delivers ANSI/WCMA A100.12022 certified protection through two engineered solutions: one designed for cord operated honeycomb and pleated shades, and another developed for ball chain loop systems across roller, double roller, honeycomb, Roman, and Venetian shades. Built for secure installation and modern aesthetics, the range elevates both safety and system performance.

Specialty Applications & Miscellaneous Products

Louvolite Chain Safe Pro

Louvolite

Louvolite Engineering Team

Louvolite's new Chain Safe Pro is an advanced child safety chain tidy for roller and Vision blinds. Fully compliant with ANSI and WCMA standards, it ensures safe, secure operation in residential and commercial settings. Designed to prevent improper installation, Chain Safe Pro delivers consistent tension and reliable performance. Quick and easy to fit, it is available in White, Black and Anthracite to suit modern interiors.

SL20 Spring Assist Booster Rollease Acmeda

Matthew Weitz (Product Manager)
Joshua Wang (Mechanical Engineer)
Dean Jay (Sr. Mechanical Engineer)

The SL20 Spring Assist Booster is a new product in the Skyline portfolio and can reduce lifting efforts with heavy shades by up to 40%. It can be used in both residential and commercial settings and helps shades comply with the Americans with Disabilities Act. This product is available for anyone to purchase. Comes in a kit with 5 boosters and parts needed for assembly. Available for left and right hand operations, and standard and heavy duty versions. Manuals and videos available online.

Verticals/Panel Tracks (All Finishes)

Adjustable Sliding Panels (Crystal)

Calendar Enterprises Co., Ltd.
GoDear Design Team

Adjustable sliding panels feature an extendable 4-rail track and trimmable fabrics for a tailored fit. The bottom bars conceal cut edges for a custom look. Available as stylish window blinds, patio door covers, room dividers, or closet doors. Crystal is a refined paper weaving product featuring a unique multi-tonal layer that transforms sunlight into a gentle, luminous glow. The delicately woven texture captures light with subtle shimmer, creating a graceful and welcoming ambiance.
